Feedback from the Industrial Supervisor	Technical Grading - 4/5 - Technically gifted with incredible ability to dive deep until he arrives at the right solution. - Needed little to no help in most scenarios, implementing end to end powerful azure automation script with minimal support and bugs. - Very quick on the uptake, picked up all tasks given to him headfirst, figuring out the next steps through own ability and feedback. - Because he isn't from the same background, groundwork has to be laid i.e the basics have to be polished and this is my only recommendation moving forward. Communication and Personality - 5/5 - Hard worker, he has the ability to keep pushing forward where many usually falter especially in high pressure environments. - Excellent communication skills, delivers his questions and requirements in a clear and concise fashion. Overall - 9/10 - Has a bright future ahead of him.
